

PALCO 1 SUBIDA

Warehouse platform of a climb.

Mobile warehouse platform made of ribbed extruded aluminum. It features a large work platform 60x80 cm, footers and guard-rails of 1 m high to protect the worker. Convenient rising 60 cm wide and 55° tilt, steps anti-slip flat with a depth of 20 cm. The automatic breaking system activates when the ladder is in use position and turns off when the worker goes down. The platform moves easily thanks to its 125 mm diameter wheels. Nearly vertical side and rear, perpendicular to the ground which allows the worker to approach the machinery or surfaces where it will do the job. The platform follows with detailed disassembled and assembly instructions.

TECHNICAL

- Number of steps: 3 to 8;
- Distance between steps: 23 cm;
- Steps depth: 20 cm;
- Profile size: 65x25 mm;
- Width rise: 60 cm;
- Climb the slope grade: 55°;
- Dimensions platform: 60x80 cm;
- Height handrail: 100 cm;
- Footer height: 6 cm;
- Platform height: from 0,66 to 1,86 m;
- Total height: from 1,57 to 2,77 m;
- Capacity: 150 kg.

EQUIPMENT

- Handrails;
- Footer;
- 2 wheels with brake;
- 2 self blocking wheels of 125 mm diameter;
- Use and maintenance manual;
- Identification label.

OPTIONS

- 2nd side handrail rise;
- Platform without wheels;
- Tray tool holder;
- Closing door.
