

PRO'MASTER®

Professional step ladder with tray tool holder.

Step ladder for professional use manufactured in aluminum with maximum strength. The steps are riveted to the profiles constituting a very sturdy structure. Very convenient due to the width of the steps that have 8,50 cm deep. It offers tray tool holder at the top, broad platform and guard-rails that offers a lot of security to carry out work at height. The Pro'Master® step ladder is certified according to european standard EN 131.
